

DON'T CRIMINALIZE SELF-DEFENSE!

I-1639 will TAX gun ownership and potentially makes you a criminal for simply owning a firearm or trying to protect yourself and your family. Here's the basics:

- I-1639 arbitrarily increases waiting periods to buy a gun, even if you can pass an *instant* background check—and even for victims of crimes and stalking.
- I-1639 would create statewide excise taxes on firearms that could later be increased. A tax on your constitutional right to protect yourself and your family.
- I-1639 creates a privacy nightmare for gun owners by giving more data and creating a universal registry of all your information and the guns you own with the Washington State DOL—which was recently panned for disclosing information of Washington residents without a warrant.
- I-1639 will make expensive training courses and taxes mandatory—even if you already own a gun or can prove you are knowledgeable and understand basic gun safety.
- I-1639 will make it basically impossible for individuals 18-21 to purchase or adequately defend themselves and their family with a firearm—even if they are trained, vetted, and can pass a background check.
- I-1639 inserts politically charged and factually inaccurate and politically motivated “assault weapon” propaganda language into state law.
- I-1639 will create a crime of “community endangerment” if for any reason you do not store your gun in compliance with the new arbitrarily created law and a criminal breaks in your home and steals your gun. The burden of proof will be on *you* to prove you are innocent of this new and extremely vague crime.
- I-1639 attempts to force firearms owners and buyers to release medical privacy rights.

Finally, I-1639 does nothing to *actually* help public safety nor school security; nothing to crack down on hard core criminals or keep them in jail; and nothing to help individuals in a mental health crisis. We need your help to prevent this billionaire-funded initiative from becoming law.
